april HOrOscOpe Signs

Aries - March 21 to April 19

Aries is the first sign of the Zodiac, and as you might expect, Aries loves to be number one. A fire sign, Aries is bold and ambitious and will dive headfirst into even the most challenging situations, making sure that they always come out on top! Uncomplicated and direct, they can often become frustrated by exhaustive details and nuance. Aries looks after they leap, which can mean lessons are often, unfortunately, learned the hard way.

Taurus - April 20 to May 20

Taurus is a sign that likes to closely examine things in order to understand how stuff work and what makes people tick. While gentle by nature, Taurus don't like to be pushed. This star sign loves home comforts, and prioritizes the good life over everything else. Their desire to ponder and consider every move is what can also make these intensely physical creatures often appear stubborn. Taurus are natural born foodies, and don't eat to live, but instead, live to eat. You'll usually find little drama or tension with them, as they are soothing, stoic, and happy in their own skin.
